Conference Programme

CAPE TOWN
26-29 July 2020

The 21st Annual BHF Conference

Leading change in strengthening our
ecosystem: The Healthcare 2.0 Initiative

Conference Programme

Theme Summary

The Healthcare 2.0 initiative: Leading change in Strengthening our ecosystem

The Challenge!

Whatever the future holds, one thing is clear – 2020 and beyond cannot be business as usual in healthcare!

This year's conference is a call for 'narrative justice'- in shaping our historical present and future - a different story has to be written about the role of non-state actors within a pluralistic health system.

The Opportunity!

The theme 'Leading change in strengthening our ecosystem: The Healthcare 2.0 initiative' is centered around an active response to our current health situation, calling the health sector to take leadership by looking at what we have learnt and crafting strategies for what remains to be done. We must make it everybody's business to strengthen our ecosystem in tandem with the transformational healthcare reform debates

Our Goal!

To actively participate in efforts to build stronger health systems, which heavily depends on a country's context, most importantly its sustained commitment, cross-learning, leadership, transparency, good governance and agility.

Innovative steps must be taken to shape the future health status of the population and to regain health citizen trust.

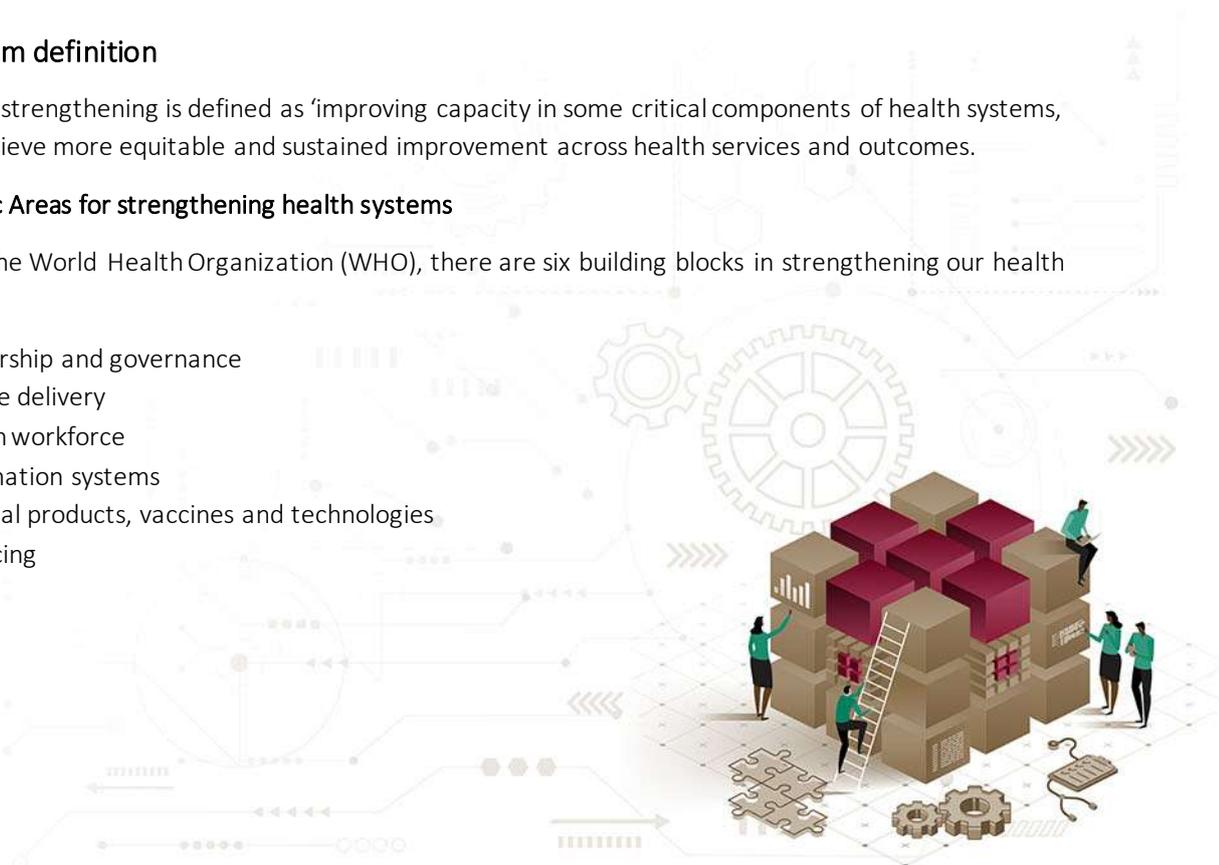

Health System definition

Health system strengthening is defined as 'improving capacity in some critical components of health systems, in order to achieve more equitable and sustained improvement across health services and outcomes.

Vital Thematic Areas for strengthening health systems

According to the World Health Organization (WHO), there are six building blocks in strengthening our health system:

1. Leadership and governance
2. Service delivery
3. Health workforce
4. Information systems
5. Medical products, vaccines and technologies
6. Financing
