Leading change in strengthening our healthcare system

Dear Delegate,

As we reconvene the annual BHF conference after two years, we are delighted to welcome 800 delegates representing more than 160 healthcare organisations from nine countries.

Two years later, the COVID-19 pandemic has severely impacted various health systems across the African continent, deepening the challenges and widening the socioeconomic-related health inequality in the region.

As we move beyond COVID-19, it has become apparent that we need to strengthen our healthcare systems. Themed 'Leading change in strengthening our healthcare system', we call on the sector to demonstrate leadership and make it their business to strengthen the ecosystem, in tandem with transformational healthcare reform debates.

One of the main lessons for us was that we must adapt and accelerate efforts to address our healthcare challenges and align across sectors to lead change in promoting access to quality care for the health citizen. The time has come for the healthcare industry to leverage the power of cohesion and collaboration to create innovative solutions that will transform and accelerate change.

The BHF programme committee has put together an impressive speaker line-up of over 70 local, regional and international healthcare industry experts, business leaders, researchers and intellectuals.

2

WELCOME

Speakers will engage with the intention to develop an action plan to support efforts to strengthen healthcare systems across the region, while promoting sustained commitment and collaboration in the sector, as COVID-19 continues to challenge healthcare systems across the world.

It is critical that we strengthen our healthcare systems, given the need for better preparation for any future crises and pandemics of this nature.

We are also excited to host the 7th annual Titanium Awards, which continue to be recognised as one of the industry's top honours, paying tribute to those who do outstanding work in the region.

Thank you to our sponsors, speakers and delegates for making this event possible once again. Lastly, a big thank you to the organising team; this event would not have been possible without their teamwork, dedication and hard work.

Yours sincerely

Zola Mtshiya

Head: Stakeholder Relations and Business Development, BHF

BHF Members

Thank you to all our members for supporting the BHF, especially during the past two years, and a warm welcome to all our new members.

Help Keep Young Girls at School

Young girls in South Africa are forced to miss school due to a lack of sanitary towels. Regrettably, this pattern may have an impact on the child's educational development.

To keep young girls at school, BHF has partnered with the PAD Run initiative as part of the annual conference CSI initiatives. The Pad Run is a registered non-profit organisation that focuses on supplying young women in various communities in South Africa with sanitary ware, as well as education on menstruation and related topics.

We invite all delegates to join us and make this initiative a success by bringing along a pack of sanitary pads each day. A drop-off bin will be available at the registration desk for the duration of the conference.

Donate Your Conference Bag

At this year's conference, 'donate your conference bag' will be one of the CSI initiatives we encourage delegates to support.

The Board of Healthcare Funders, in partnership with AstraZeneca, would like to donate as many bags as possible to the Bloekombos secondary school in Kraaifontein, Cape Town.

As such we would like to invite all delegates to join us in this initiative by donating their conference bags, after the conference.

Should you wish to participate in this initiative, please drop your bag at the registration desk on the last day of the conference (Saturday, 21 May 2022).
